

WHAT'S GOING ON?

A series of public events with well-informed speakers on issues that are affecting us now and will determine how we live in the future

MONDAY 27TH OCTOBER, 6.00 FOR 6.30pm
BYRON SERVICES CLUB – 132 JONSON ST, BYRON BAY

OUR DIGITAL FUTURE

SPEAKER: MICHAEL WILLIAMSON

With the rollout of Australia's Digital ID currently underway, new online codes of conduct announced, and age verification laws starting soon, we examine the digital landscape that is unfolding. Does it really offer a new era of convenience and security, or could the conspiracy theorists be on to something that is far more concerning? Michael breaks down the key elements, exposes the facts, and provides a clear understanding of what is actually going on, the government's timeline, and how we might respond.

TRANSHUMANISM – IS IT THE WORLD'S MOST DANGEROUS IDEA?

SPEAKER: FIONA LOVE

In this powerful presentation, author and researcher Fiona Love unpacks the history and intent behind today's accelerating push towards digital integration, and transhumanism. Fiona looks at the emergence of the modern technocratic state, shows how money, mind control, and medicine have been used to centralise power and surveillance infrastructure. Her talk explores how the recent pandemic served as a turning point for merging biotechnology and governance. She looks at how awareness, curiosity, and community-based solutions can restore genuine autonomy. With calm clarity and deep research, Fiona connects history, psychology, and spirituality to reveal a simple truth: the future of humanity depends on our choice to align with nature, not machines.

DO NOT MISS THIS EVENT

Please come along, get clear factual information, and be part of the discussion.
